

Building design

It's approached by a 34 for pedestrians

The building is the shape of a 35

One exterior wall acts as a large 36

In the auditorium:

- the floor is built on huge pads made of 37
- the walls are made of local wood and are 38 in shape
- ceiling panels and 39 on walls allow adjustment of acoustics

Evaluation

Some critics say the 40 style of the building is inappropriate
